Gaming Better Grades

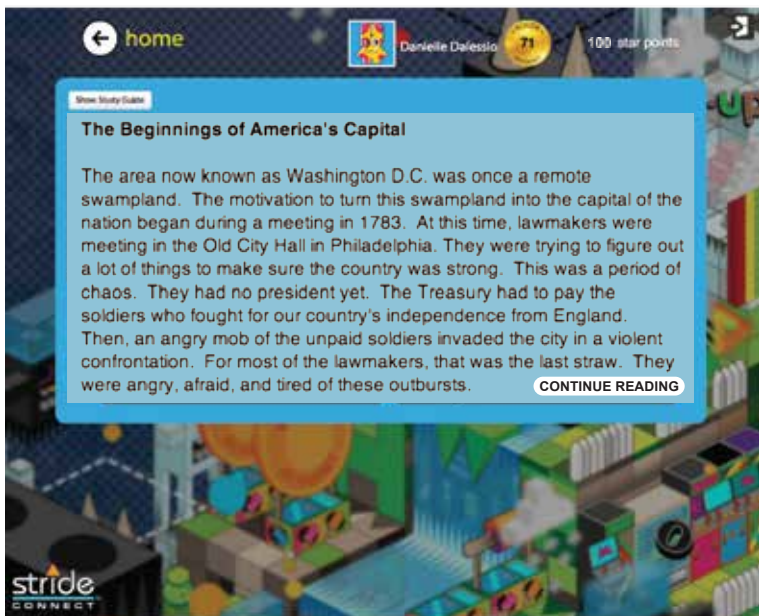

# High School Curriculum

## Timely Intervention & Enrichment to facilitate College & Career Readiness

As more school systems transition to the new Common Core Standards and assessments, all students, but *especially* high school students, must be prepared for more rigorous coursework and more rigorous assessment.

These shifts are intended to shape students for success in both college and careers, so they can be knowledgeable, competent and confident in their futures.

### End of Course Content for Reading & Mathematics

For high school students, **Stride Connect** offers end of course content in reading and mathematics aligned to the CCSS, including: Algebra I & II, Geometry, English I, II & III.

#### In Mathematics:

- Students will engage in foundational practice in algebra and geometry concepts.

#### In Reading:

- Text complexity is measured for each passage, using validated readability methods to ensure vocabulary and word count are grade-level appropriate.
- Passages are longer and complex, between 1,500 and 2,000 words.
- Students will practice key skills, such as: inferring, drawing conclusions, identifying main ideas, and summarizing.

# Introducing Real-Life Applications for Key Concepts

**Stride Connect** high school content initiates independent thinking and conversations about relevant issues in society today. And, it presents problems and activities that are applicable to everyday life at home or in a community.

## High School Reading

Informational passages about relevant topics and issues in Science & Technology and Social Studies, such as:

- Hurricane Sandy
- Social Networking
- Immigration Laws

Literary pieces from enduring authors, like:

- William Shakespeare
- Louisa May Alcott
- Mark Twain

## High School Mathematics

Problems presenting opportunities for real-life modeling:

- Managing a bank account: investing and earning interest
- Working with measurements and scale drawings
- Finding averages in order to find the grade needed on a test

## Singular, Sophisticated Game Play for Unmatched Learning Excitement

**Stride Connect** games are unparalleled in the educational technology sector. Superior graphic quality in games from diverse genres – arcade, physics, logic, sports – set the student experience apart from any other edugaming program for high school. Available on tablets, PCs and Macs for anytime online access.
