

ANNOUNCING KID'S COLLEGE ENHANCEMENTS 2009-10 SCHOOL YEAR

Birmingham, AL – July 14, 2009 – Learning Through Sports (LTS) is excited to announce several new enhancements to its Kid's College® online educational software program for the upcoming school year. New features scheduled for release in 2009-10 include a new interface, new skateboarding and hockey games, server upgrades and faster report generation. Students and teachers alike will benefit from an improved user experience in the Kid's College Learning System, which uniquely combines adaptive, virtual Math and Reading curriculum with engaging sports video games to motivate today's digital students.

Check out these new Kid's College enhancements in 2009-10:

- **New Interface to Boost Student Experience**
A new and visually improved user interface will transform Kid's College into an indoor sports arena. Animated loudspeakers and rotating graphic displays transport students into the center of the action, upping their excitement to compete. The new look and feel provides a more engaging Kid's College experience than ever before.
- **Two New Games! Skateboarding and Hockey**
Kid's College is adding two increasingly popular sports. And, teachers now have the ability to customize the time allowed for each sport turn by individual student. Select "Edit Student Info" on the Class Roster tab in the Classroom Management System.
- **New Server Upgrades Ensure High System Responsiveness**
Kid's College servers continue to support multiple simultaneous users in your classroom.
- **New Reporting and Curriculum Optimizations**
Available Now:
 - ✓ **The Executive Reporting Warehouse** for conveniently viewing all your Executive Reports stored in one place, online. To access, click the new "Get Executive Reports" button on the Reports tab in the Classroom Management System.
 - ✓ **Easily Set Curriculum for an Entire Class.** Select the new "Set All Students to Class Default" button on the Curriculum tab in the Classroom Management System.
Coming Soon:
 - ✓ **Faster Report Generation**
